

# We will give you the Red Carpet Treatment

## TWO GREAT WAYS TO CLEAN

### Method 1

#### INSPECTION

We discuss any concerns, identify spots and stains, decide on the best method to clean your carpets.

#### VACUUMING

High powered industrial vacuum cleaners are used to remove dry soil and to separate pile.

#### STAIN REMOVAL

We have a large range of professional spot and stain removal products.

#### PRE SPRAY

Heavy duty Pre spray is applied to break down oily pollutants.

#### HOT WATER EXTRACTION

We use extremely powerful extraction machines to clean deep down into your carpet, removing dirt, grit, carpet mites and other allergy bugs. During this process we also rinse a liquid deodoriser through leaving your carpet with a fresh and fragrant smell.

#### TURBO DRYING

If possible powerful turbo dryers can be used for quick drying.

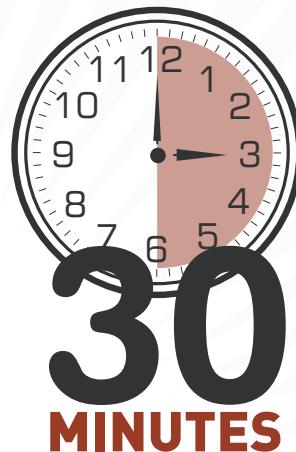

#### FINAL TOUCHES

We groom your carpet to restore fullfillness.

### Method 2

CARPETS DRY IN

Combining all the latest technology this low moisture method of cleaning can provide great results.

- This system has been approved by Interfaceurope and is woolsafe approved.
- Environmentally friendly.
- Perfect for carpet tiles.
- Anti static coating - great for the office.
- Low noise level.
